

ACTIV PHONE

Supporting your independence

The ACTIV PHONE is a wireless, loud speaking, remote controlled phone, which enables individuals with mobility issues to receive and make calls using an external controller.

Flexibility

Designed to give the user the privacy and freedom to live independently, the ACTIV PHONE can also be set up in an internal network with other phones to allow room to room communication between the user and their family/carers. The ACTIV PHONE can also be configured to work with an intercom system to allow full door entry functionality.

Though originally designed for use with the ACTIV 500, the ACTIV PHONE is compatible with many other environmental controllers currently available on the market.

Features:

- Answer the phone and make calls using an ACTIV 500 or other controller
- Internal network facility to allow room to room calling
- Paging facility
- Door entry function
